

Client Interest Rate Policy

Executive Committee approved instruction to Finance to change the rate shared to clients to 0.9% (previously 1.15%).

This policy outlines how TPW calculates and pays interest on any cleared cash balances held within your TPW accounts.

How we calculate interest

The cash you hold is held in one or more clearly identified client bank accounts held with our trusted banking partners. We work hard to ensure this money is protected and earns an appropriate level of interest which we share with you.

The interest rate that currently applies to your cash balances is:

	Interest earned from our banking partners**	Interest we retain	Gross Interest (passed on monthly to you)
From 6 th February 2025* to present	4.20%	3.3%	0.9%

*Bank of England Base Rate changed to 4.50%

**TPW have more than one banking partner. The table above shows the interest paid to you from all accounts and the amount currently retained by us. Some of our banking partners pay less interest to us and therefore a lower amount is retained by us.

Interest is calculated on a daily basis and applied to your account every month.

How the interest rate may change

The interest we share with you is variable and may be different in the future. For example, we may change the rate we pay when the UK Base Rate changes, when major UK banks change their rates or when we periodically review our charging structure.

The rate we earn from our banking partners may be higher or lower than the UK Base Rate and may vary on a daily basis.

Interest rates can be zero and from time to time, our banking partners may apply a negative rate of interest. Where this occurs, we reserve the right to pass on the negative rate to you.

We do not charge custody or investment management fees on the value of the cash you hold.
